

MRB Group was retained by Hospice of Orleans County to help plan, program, conceptualize, provide architectural and site design, and manage affordable and timely construction of a new facility that would serve the needs of an organization dedicated to providing critical end-of-life support to patients and families in Orleans County.

The objective was to create a serene, modern, yet efficient and fully-functional single-story, 8,500 square foot facility which would include eight residential patient suites.

MRB Group's project planning, designs and construction management considered every detail and facet surrounding the organization's delivery of exceptional care.

Services included consideration of interior designs and mechanical, plumbing, electrical, and fire protection design to ensure an energy efficient and safe environment that is environmentally and fiscally sustainable.

Client: Hospice of Orleans

Completion Date: 2012
